

Simple, effective, reimbursable sleep surgery is in your hands

Simple

- Suspension tension easily set and adjusted without knot tying
- Bilateral suspension can be placed with single hyoid pass
- Self-guided tongue base suture passer: no intraoral needle pass needed

Effective

- 73% median improvement in sleep apnea when performed with UPPP
- Adjustable tension ensures optimal advancement
- Tongue suspension stitches can be added for total tongue base stabilization

Productive

- Easy to perform 30 minute procedure
- Hyoid suspension CPT 21685 covered by most private payers and CMS
- Single kit complete for hyoid and tongue suspension

Hyoid Suspension: Single hyoid suture pass with adjustable suture tension

Simple, precise tensioning with knotless suture anchors

Combined treatment: Hyoid Suspension with Tongue Suspension
